Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes

6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
OptiCrop
|
├── static/
|   ├── css/
|   ├── js/
|   └── images/
|
├── templates/
|   ├── index.html
|   ├── login.html
|   └── prediction.html
|
```

```
├── model/
│   └── crop_prediction_model.pkl
│
├── database/
│   └── users.db
│
├── app.py
├── requirements.txt ├── README.md └── dataset.csv
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://opticrop-smart-agricultural-production-jfec.onrender.com
Login Credentials	No
Platform / Hosting Provider	Local System / Flask Server
Repository Link	https://github.com/tanuboddisivasaisrisachinreddy-archfp/OptiCrop-Smart-Agricultural-Production-Optimization-Engine Or https://share.google/WsBwEgTpexhx75gdh

Demo Video Link	https://drive.google.com/drive/folders/1mGBP0dHj18gItRVa_61scVrItyTskExa?usp=share_link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

Python 3.x, Flask, VS Code / Anaconda, Internet Browser

Step 1: Download or clone the project repository

Step 2: Install required dependencies using requirements.txt

Step 3: Open the project folder in VS Code or Anaconda

Step 4: Run the Flask applica on using python app.py Step 5: Open the localhost URL in browser

Step 5: Known Issues / Limita ons

S.No	Known Issue / Limitation	Workaround / Status
1	Real-time weather data not integrated	Planned for future enhancement
2	Limited mobile responsiveness	UI improvements in progress

3	Requires internet for some dependencies	Use offline packages if needed
